Risk level	3
Objective	To provide returns of CPI + 1.5% pa over 2–3 year rolling periods, with lower volatility and more moderate drawdowns than peers.
Description	The Evergreen Advantage Defensive Model provides investors with a portfolio that is invested solely in defensive assets. Investors should expect the Model to provide strong capital preservation and returns primarily in the form of income. Using a ‘top-down, bottom-up’ approach, Evergreen works to provide investors a well-diversified portfolio that will be resilient through various economic and market conditions and will deliver on model objectives.
Suggested length of investment	The minimum investment timeframe should be three years. Investors should understand that capital preservation is not guaranteed and that there is risk of price fluctuations, particularly over periods less than three years.
Management Costs	ICR 0.53%*

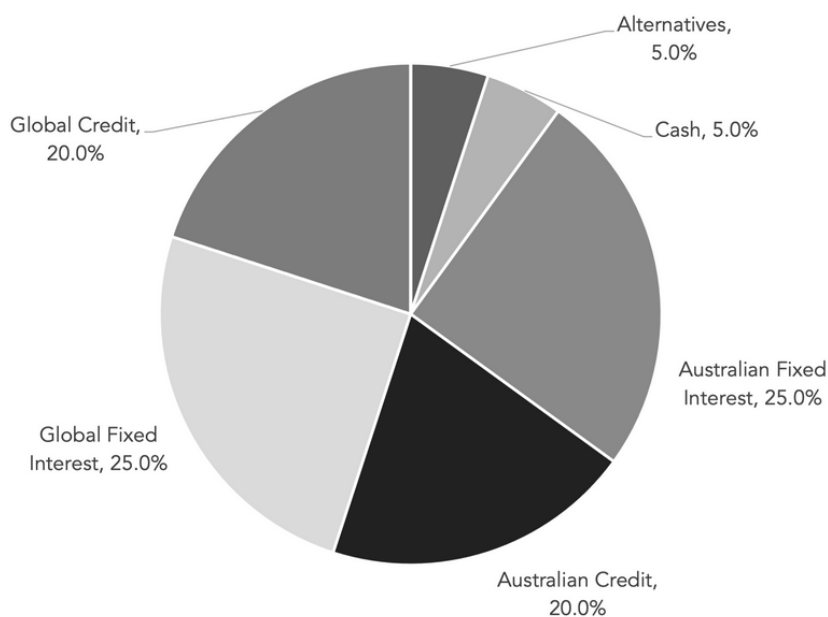

INVESTMENT APPROACH

Evergreen believes that asset allocation is the primary driver of long-term returns. The Model's Strategic Asset Allocation (SAA) has been designed to deliver on investment objectives over the investment time frame. Some tilting around the portfolio's SAA will also be undertaken, in line with the views of our Asset Allocation Committee. Evergreen conducts extensive analysis of potential investment options allowing Evergreen to construct a well-diversified defensive portfolio, capable of meeting both its investment objectives.

ABOUT THE MODEL MANAGER

Founded in 2016, Evergreen is now one of Australia's leading investment consultants. Boasting one of the largest and most experienced investment teams in Australia, Evergreen is known for the quality of the in-depth, internally generated research it undertakes through all parts of the portfolio management process including asset allocation, manager selection, portfolio construction and on-going monitoring. Through this rigorous process, Evergreen strives to build robust portfolios which will meet all portfolio objectives with certainty.
